HYUNDAI MOTOR GROUP

HYUNDAI STEEL

We lead the steel industry ···

From molten metal to finished cars, and from Korea to the world, Hyundai Steel is heralding a new era of change and innovation in the world's steel industry. It is doing this by developing an eco-friendly production system that is firmly grounded on the "3Rs" – reduce, reuse, and recycle.

CONTENTS

HISTORY OF HYUNDAI STEEL

Having merged with Gangwon Industries in 2000 and Hanbo Steel in 2004, Hyundai Steel came to acquire three major steelmaking plants, including those at Incheon, Pohang, and Dangjin. After joining the Hyundai Motor Group in 2001, the company changed its name and corporate identity to “Hyundai Steel Company Limited” in 2006, and paved the way for significant growth when it began to build an integrated steel mill in 2007. Having acquired Hysco’s cold rolled steel division in 2013, Hyundai Steel now operates four plants, including the one at Suncheon.

Foundation

1953

1953. 06
Founded as Daehan Heavy Industries Company.

1962. 11
Changed company name to Incheon Heavy Industries Company Limited.

Reclamation

1964

1964. 09
Incheon Steel Company Limited founded.

1970

1970. 04
Incheon Steel acquires Incheon Heavy Industries.

1978. 06
Incheon Steel joins Hyundai Motor Group.

Development

1980

1987. 05
Initial public offering.

1990

1994. 12
90-ton electric steel mill and second rebar plant built.

1998. 03
120-ton electric steel mill and new heavy rolling plant built.

Advancement

2000

2000. 03
Gangwon Industries Company Limited acquired.

2000. 12
Sammi Special Steel Company Limited acquired.

2001. 04
Company newly launched as part of Hyundai Motor Group.

2001. 07
Company name changed to INI Steel Company Limited.

2004. 10
Dangjin plant and assets of Hanbo Steel acquired.

2006. 03
Company name changed to Hyundai Steel Company Limited.

2006. 09
Opening ceremony for 50,000-ton pier for Dangjin plant held.

2006. 10
Groundbreaking ceremony for integrated steel mill held.

2009. 08
First raw materials delivered to integrated steel mill.

2009. 11
Cokes, incineration, and thick-plate plants of integrated steel mill launched into operation.

2010. 01
Blast Furnace 1 installed and launched into operation at integrated steel mill.

2010. 04
Construction completion ceremony for integrated steel mill held.

2010. 11
Blast Furnace 2 installed and launched into operation at integrated steel mill.

2012. 11
Dangjin plant acquires Green Management System certificate.

2013. 09
Blast Furnace 3 launched into operation at integrated steel mill.

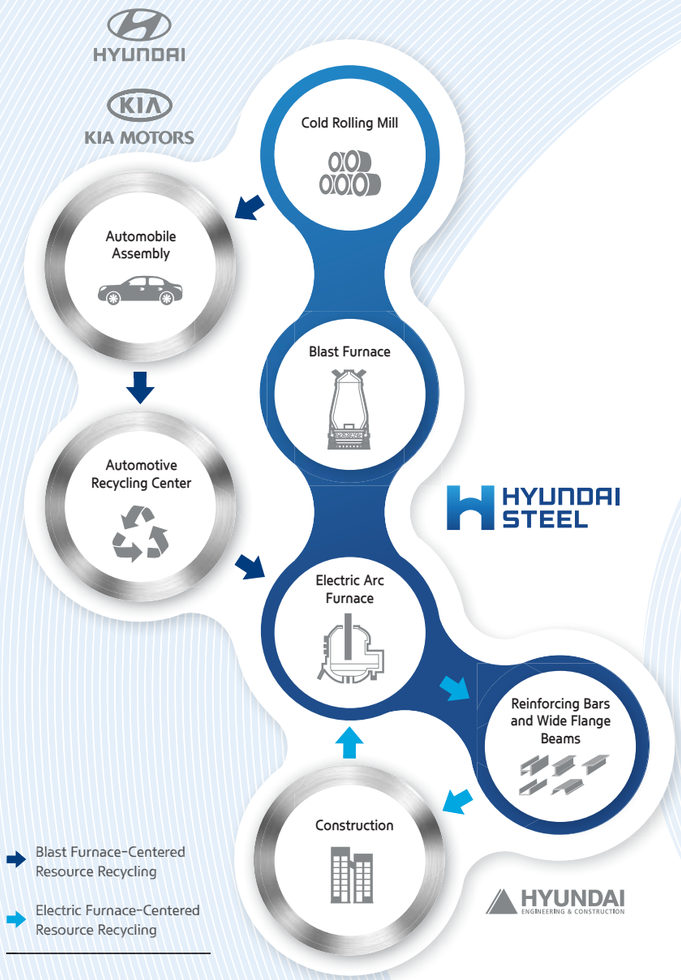
2013. 12
Cold rolled products launched on market.

2014. 04
Groundbreaking ceremony for special steel mill held.

2015

2015. 07
Merger with Hyundai Hysco.

NEW ERA OF RESOURCES RECYCLING



Perfecting Resource Recycling Group-Wide

Having added blast furnaces to its plants, Hyundai Steel is now part of a complete eco-friendly resource recycling system that encompasses the entire Hyundai Motor Group, allowing the efficient and thorough use of iron ore, finished automobiles, and steel scrap. As Korea's largest recycler of steel and other related products, Hyundai Steel continues to enhance the quality of its products with its well-functioning blast and electric furnace systems. The furnace-centered recycling system starts from the production of crude steel, proceeds via the manufacturing of hot and cold rolled steel coils and sheets (at Hyundai Steel), to the manufacturing of finished automobiles (at Hyundai and Kia Motors) and finally to the recycling of scrap cars and steel (at the automobile recycling centers). The steel scrap from the last phase of this cycle is recycled into material used to manufacture rebar and H-shaped steel in Hyundai Steel's electric furnaces, which are then used in works of civil engineering and construction (by Hyundai Construction and Engineering). Any scrap building materials from these construction projects are also recycled.

MANUFACTURING

Dangjin Steelworks

Since Hyundai Steel developed Korea's first privatized integrated steelworks in 2010, Dangjin Integrated Steelworks has been rewriting the history of steel in Korea. The Steelworks includes both blast furnace and electric arc furnace zones. The former consists of hot rolling, cold rolling, and heavy plate mills including three blast furnaces while the latter produces reinforcing bars, using scrap iron as a raw material. Additionally, the special steel mill is under construction and on the way to complete.

▶ Products : Hot-rolled Coil, Cold-rolled Coil, Heavy Plate, Reinforcing Bar

Incheon Plant

The company's Incheon Works was the very first steel plant in Korea. Its eco-friendly, high-efficiency facilities include the world's largest electric arc furnace mill and a host of environmentally friendly devices and activities, including recycling its purified wastewater for further use. The addition of the Incheon North Port Steel Dock, completed in January 2007, has made a significant contribution to the plant's overall operating efficiency.

▶ Products : H Sections, Reinforcing Bar, Stainless Steel, Section Steel, Steel Forging Products

Pohang Plant

Boasting a wide range of industryleading technologies and strong global competitiveness, Hyundai Steel's Pohang Works was only the second player in the world to develop high-speed magnetic levitation train rails. In addition, we lead the steel industry's high-value-added market through the production of rolled steel and rails for high-speed railroads. Our track shoe assembly has been recognized by the Korean government as World-Class Products of Korea.

▶ Products : H Sections, Reinforcing Bar, Railroad Rail, Round Section, Roll, Track Shoe Assembly

Suncheon Plant

Suncheon Works, which is equipped with state-of-the-art production facilities, specializes in a broad range of cold-rolled steel for automobiles, consumer electronics, and construction materials. These high-end facilities include a Continuous Annealing Line (CAL) boasting the world's largest production capacity of 1.2 million tonnes, a Continuous Galvanizing Line (CGL), an Electrolytic Galvanizing Line, a Color Coating Line, and six tailor-welded blank (TWB) units for lightweight automobiles.

▶ Products : Cold-rolled Coil, Hot-dipped Galvanized Steel Sheet, Electrolytic Galvanized Steel Sheet, Pre-coated Steel Sheet

Ulsan Plant

Equipped with four tailor-welded blank units, two hot-stamping units, and three hydro-forming units, Ulsan Works produces high value-added steel pipe products and lightweight automotive parts used primarily in energy development, construction, and automobile manufacturing. The global competitiveness at Ulsan Works has been greatly enhanced thanks to its cutting-edge welding and automation facilities.

▶ Products : Steel Pipe

Yesan Plant

Yesan Works primarily produces high-quality, lightweight automotive parts through ten hot-stamping units and two tailor-welded blank units. Making the best use of its amassed technologies and expertise over the years, Yesan Works has continuously enhancing its competitiveness in the steel market as well as ultimately leading the quality improvement in automotive and other steel-demanding industries.

▶ Products : Lightweight Automotive Parts

Qingdao Plant

Established in 2000 to meet China's rapidly increasing need for steel products, the Qingdao Factory manufactures complete track shoe assembly. It also acts as a bridgehead for the company's advance into the world by placing us firmly within the Chinese market. The Qingdao Factory ranked first in the Chinese market for excavator undercarriages and parts.

▶ Products : Track Assembly for Excavators, Roller

ABOUT ULSAN PLANT

Ulsan Plant

Ulsan Works produces highly value added steel products which has annual capacity of production of 700,000 tonnage. It is the hive of steel pipe industry in Korea, retaining high technology and facilities. The major products in steel pipe industry - OCTGs and gas pipes - are now being produced and supplied including almost 2,000 types of highly value added products such as industrial boiler tubes, pipes for mechanical and automobile structure. Especially, we are now giving spurs to development of the next generation steel pipe and new technology for reducing automobile weight through researching high technology field like hydro-forming. After the ground-breaking in Yumpo Bay, Ulsan 1978, it has been leading mill in domestic steel pipe industry. By acquiring ISO 9001/14001, we are now heading for the quality-first and eco-friendliness management. Ulsan Works will try to remain as leading steel plant in the world through developing new technology for welding and modeling, and parts that could reduce weight of automobiles.

API 2B

- API 2B pipe is suitable for use in connection of welded offshore structures.
- The purchaser shall specify the grade and quality of plate steel to be used.
- Dimension (Outside diameter, thickness, length) are specified by purchaser.
- Tolerance on roundness, straightness, circumference are determined by purchaser and API 2B requirements.
- HYSCO produces API 2B pipe in accordance with API 2B and purchase requirements.

CONVERSION METHOD

1. Unit Weight Calculation Method

W = 0.02466(D-t)t
W : Weight per unit length(kg/m)
t : Thickness of steel pipes(mm)
D : Outside diameter of steel pipes(mm)

W = 10.68(D-t)t
W : Weight per unit length(lb/ft.)
t : thickness of steel pipes(in.)
D : Outside diameter of steel pipes(in.)

2. Conversion of unit

Items		Unit
Length	1.00000	mm
	1.00000×10^{-3}	m
	3.93701×10^{-2}	in.
	3.28084×10^{-3}	ft
Weight per unit length	1.00000	kg/m
	3.04800×10^{-1}	kg/ft
	6.71971×10^{-1}	lb/ft
Force per unit area	1.00000	N/mm^2(MPa)
	1.01972×10^{-1}	kgf/mm^2
	1.01972×10	kgf/cm^2
	1.45038×10^2	lbf/in^2
Temperature	32+9/5° C	F
